

3. Create a simple cloud software application for Car Booking Reservation System using any Cloud Service Provider to demonstrate SaaS include the necessary fields such as search for cabs, from, to, rental , out station, Package type, hours/Days etc.

Step 1: Create the customer details form

The screenshot shows a web browser window displaying a Zoho Creator application titled "Car booking reservation". The application is in a trial phase, with a message "Trial expires in 14 days" and buttons for "Upgrade", "Edit this application", and "Help". The left sidebar contains a menu with "Customer Details" (selected), "All Customer Details", "Car Details", and "Payments". The main content area is titled "Customer Details" and contains the following form fields:

- Customer Name: Two input fields for "First Name" and "Last Name".
- Phone Number: A dropdown for country code (set to +91) and an input field for the number (81234 56789).
- Email: A single-line text input field.
- Address: Two stacked text input fields for "Address Line 1" and "Address Line 2".
- City / District: A text input field.
- State / Province: A dropdown menu currently showing "-Select-".

Step 2: Create the Car details form

The screenshot shows the same Zoho Creator application, but now displaying the "Car Details" form. The left sidebar menu is updated, with "Car Details" selected. The main content area is titled "Car Details" and contains the following form fields:

- Company name: A single-line text input field.
- Car model: A dropdown menu currently showing "-Select-".
- Branch address: Two stacked text input fields for "Address Line 1" and "Address Line 2".
- City / District: A text input field.
- State / Province: A dropdown menu currently showing "-Select-".
- Postal Code: A text input field.
- Country: A dropdown menu currently showing "-Select-".
- Branch Phone Number: A dropdown for country code (set to +91) and an input field for the number (81234 56789).

Step 3: Create the payments form
